# Mini-Com<sup>®</sup> Shielded High-Density Modular Patch Panels

# **SPECIFICATIONS**

Shielded 48-port high-density patch panels shall occupy a single rack space, and be made of a stainless steel panel with molded rear snap-in faceplates that include a metal bonding strip that runs through the front midsection of the faceplate. Shall accept all Mini-Com® Shielded Jack Modules for shielded installations and shall mount to standard 19" racks or cabinets. Patch panel shall be available in 48 ports in one rack space in both flat and angled designs. Shielded 48-port high-density patch panels shall be easily identified with pre-numbered ports.

# **TECHNICAL INFORMATION**

Mounting option:	UL 508A Standard for Industrial Control Panels, UL Type 4/12 or 4X, IP66 Rated, CE	
Packaging::	Z23U: 36.0 in. x 24.0 in. x 11.7 in. (914mm x 610mm x 297mm) Z22U: 24.0 in. x 24.0 in. x 11.7 in. (610mm x 610mm x 297mm)	
Color and material:	Enclosures: Gray, 14 gauge cold roll steel or 316 stainless steel Back panels: 14 gauge galvannealed steel or 304 stainless steel	

# **KEY FEATURES AND BENEFITS**

Modular:	Accepts all Panduit® Mini-Com® shielded modules		
High density:	More modules per rack space: 48 ports per 1 RU		
Identification:	Pre-numbered ports		
Angled design:	Allows cable to flow to each side of the rack and minimizes the need for horizontal cable managers		
Optional strain relief bars	A variety of styles available to help manage and route cable		
Optional angled filler panels	Reserve space for future use and promote proper airflow and cooling		

#### **APPLICATIONS**

Mini-Com 48-port high-density patch panels are an ideal solution in areas where rack or cabinet space is an issue.

The angled version increases rack density and reduces the need for horizontal cable management systems, managing high-density network applications in one-fourth the area needed for conventional cable management systems. A strain relief bar is recommended to properly support and route the rear cables.

Mini-Com Modules can be easily switched or replaced as required. Blank modules will reserve space for future use or growth. Most panels are typically used in a telecommunication closet or cabinet but will work in other areas as well.

When installing the patch panel on the rack, the use of patented thread-forming bonding screws bond the shielded panel to the rack. The combination of shielded patch panels, shielded jack modules, and accessories provide a properly grounded system.
