

SST™ Central Tube Steel Armour Outdoor Cable 12F E9 SMF-28e+® ITU G652.D CT 3.0

CORNING

Part Number:
012EEC-13122A20

Corning central tube cables with corrugated steel armoring are designed for outdoor use for campus, city and intercity backbones in duct and direct burial installations.

The central tube cable construction, by isolating the fibers from installations and environmental rigors, provides stable and highly reliable transmission parameters. The fibers are color coded for quick and easy identification.

The cable construction, based on a central buffer tube, is very compact, light, flexible and ideal for connections requiring a moderate fiber count.

These cables are designed for installation in conduits, ducts and for direct burial.
