Performance**

**H6
SIP DeskPhone**

- High quality gone through century-old tests; high-end design originated from Europe; localized innovative research and development; customer-oriented one-stop service.
- The big color display model with easier connection in entry-level desktop SIP phones.
 - Big color display with bright colors and customized wallpapers to enhance the visual experience
 - Displays more lines of text and thus presents more content, for example, contacts in directory, call history, function menu, etc.
 - Supports USB and RJ9 headsets, as well as Wi-Fi Dongle connection
- Optimal components improve the overall performance of the deskphone, for example, it can boot in seconds.
- Compatible with multiple platforms, support Easy Deployment Server (EDS) and Easy Provisioning Server (EPS) deployment platforms, and hence can achieve easy massive deployment.

Design: Minimalist Esthetics + Color Display Experience

- Color display with 320 × 240 resolution for neat text display
- Blue LED indicators for prompt function and aesthetics
- Three-color appearance of black, white, and gray: black/silver gray keys, white numbers/symbols

Handset, Keys: Ergonomic Design

- The radian of the handle fits the palm so that the user will feel less fatigued after holding the phone for a long time
- On-hook through Hall sensor to prevent accidental on-hook, reduce noise, and extend the service life
- The handset made of special materials can reduce slippery with sweat
- The concave radian of digital keys properly fit finger pulp

Call Performance: Clear, Stable

- Our broadband audio technology guarantees clear conversations
- Selected chips and electronic components improve the overall performance, and guarantee robust performance even in harsh environments
- Five-party local calls
- 1,000 call logs and local contacts
- Supports headsets with RJ9 and USB-A connectors to free your hands
- 4 SIP accounts

Deployment: Easy, Effortless

- EPS and EDS help massive deployment
- Widely compatible with [multiple third-party platforms](#)
