RJ45 Cat.6 UTP Jacks, E250U

Our Cat.6 copper interconnect products work together to provide an easy-to-use solution for deploying high-speed connections throughout a building. The RJ45 jack is a key component in this system.

The jack's unique two-cable entry points help make installation simple. The traditional one-click design enables an easy, tool-less termination on unshielded twisted pair cables, meeting industry performance standards.

Features	Benefits
Tool-less jack	Easy and quick to install. Fast, reliable connection. All eight copper conductors are wired in a single operation. Quality of connection by design: just listen for the click.
Two-cable entry points	Easier cable management. More space and flexibility to ensure the cable minimum bend radius is not compromised. Enables a wide range of cable routing options. Easy to use in tight spaces. Just one product for all applications.
Reusable	If a wiring mistake is made, there is no need to use a new jack, which means virtually no wasted inventory.
Clip-in mounting	RJ45 modular jack design can fit many other accessories on the market using the standard clip-in mounting.
Accepts solid and stranded conductors	Compatible with many cables on the market and enables "jack-to-plug" cables to be manufactured using stranded conductors (for use in open-office architectures).
Integral shutter	Increased dust protection, especially during installation or in a dirty environment. No additional shuttering required on faceplates.

Specifications	
Standards compliance	Use in permanent links with dedicated cable types results in compliance with ISO/IEC 11801 (Ed. 1.0) 2017 or EN 50173-1:2018 Class E and Cat.6 ANSI/TIA/568.2-D:2018
Electrical performance Operating voltage Lead-through resistance Insulation resistance	< 75 VDC < 200 mΩ > 500 MΩ
Environmental compliance Operating temperature	-10°C to 60°C (14°F to 140°F)
Mechanical specifications Conductor diameter Maximum diameter of wire insulation Protection contacts	Solid wires: 0.50 to 0.65 mm (AWG 22-24) Stranded wires: 7 x 0.15 to 0.20 mm 1.6 mm 0.5 µm in contact zone

Cat.6 UTP Copper Patch Cords

Copper patch cords help enable you to complete your network to Cat.6 according to ANSI/TIA/568.2-D:2018 and Class E ISO/IEC 11801 (Ed. 1.0) 2017. They are constructed with UTP stranded cable, low-smoke, zero-halogen (LSZH™) or PVC jacket and protected latch to ensure durability. These patch cords are available in a variety of lengths and colours for easy cable management and administration. Corning's copper patch cords are packaged in corn starch bags.

Feature	Benefit
“Snagless” boot protects latch	Better mechanical protection helps prevent breaks so the cords last longer.
Various lengths and colours	Options to complete systems to your requirements.
LSZH version available	Meets flame requirements for low flammability and low toxicity.

Specifications	
Standards compliance	ANSI/TIA/568.2-D:2018 ISO/IEC 11801 (Ed. 1.0) 2017 EN 50173-1

Patch Panels

Copper patch panels are modular and provide an aesthetically pleasing solution for housing modular jacks. These lightweight aluminium panels are compatible with RJ45 jacks as well as typical industry-accepted modular jacks.

The classic version includes a cable-strain-relief tray and earth-connection point. The ECO panels are a simple version, without an earth-connection point, to use with racks with integral cable management. The panels include screws, cage nuts, and cable ties. Port blanking and coloured identification caps are available. The range includes a patch cord management panel with five management rings.

Faceplates and Outlets

Faceplates are compatible with most electrical wall boxes and are available in two-port and four-port versions. These faceplates fit common European dimensions and are compatible with RJ45 modular jacks. Port icons for port identification as well as label windows are included in some products.

Copper Cable

The four-pair copper cable is high performing, compliant with ISO/IEC 11801 (Ed. 1.0) 2017 and EN 50173-1:2018, ANSI/TIA/568.2-D:2018. Cat.6 UTP cable is made up of four pairs of colour-coded solid copper wires, surrounded by an outer flame-retardant jacket. The cable meets industry standards for low-voltage networks to transfer voice, data, and video signals. Applications include IEEE 802.3 standards for 10 Mb to 1 Gb networks. It is also applicable to IEEE 802.3af POE and 802.3at POE+ and ATM LAN 1.2 Gb systems.
