

Technical information

This pure sine wave Double Conversion 1–3 KVA UPS delivers highly efficient and reliable power protection and backup for your computer IT equipment. The UPS features a maintenance-free VRLA battery and is a 1–3kVA single-phase 120/230 volt unit. The pure Online Double Conversion system provides constant excellent electrical performance and comes standard with enhanced intelligent monitoring and network functions. The unit complies with ENERGY STAR® 2.0, EMC, and safety standards to meet the continually growing power demands of Data Center, Enterprise, and Edge IT Infrastructure.

Key features and benefits

Rack/Tower convertible:	Supports rack/tower installation with rotatable colorful LCD display
Online Double Conversion with fully digital control:	Provides stable and clean power with less ripple by filtering noise, automatic voltage regulation (AVR) and surge protection
Wide input voltage range:	110–300 VAC for EU units and 55–150 VAC for North America units, covering extended voltage range, applicable for severe situation such as large power grid fluctuation
High efficiency:	Up to 96.5%, reducing the energy waste and the cost of electricity
Energy savings:	High Efficiency on Smart ECO mode for Online Double Conversion models
Green design:	RoHS and Reach, CE/UL/ENERGY STAR® 2.0 compliant for North America units
Output unity power factor:	Means more active power for IT equipment load
Input power factor:	Power factor correction topology on the input side dramatically reducing the total harmonic distortion (THD)
Expandable:	Supports up to 16 expansion slots for additional power capacity
Smart Battery Management:	The most optimal curve and temperature-compensated with advanced algorithms prolonging the battery life
Emergency Stop (E-Stop):	Allows to quickly and easy shut down the UPS when emergency event occurs
Wide Input Frequency:	Wide input frequency and voltage, supports connecting to generators, ensuring the uninterruptible operation
Hot-Swappable Battery:	Can perform the replacement of battery cartridge without powering down the UPS
Smart Start:	Allows to boot up the UPS without mains input but with batteries
Smart Fan Control:	Automatically adjustment of fan speed due to the ambient temperature and load percentage
Smart Load Shed:	Loads connected to the programmable group can lose power first, saving more energy and extending the runtime for critical load. Smart Load Shed allows logical group shutdown with time or load.
Colorful LCD:	Colorful LCD with four buttons and LED indicators, providing intuitive display
Network Interface:	RS232/USB/intelligent slot, realizing communication and monitoring function
Advanced Protection:	Short-circuit, overload, overheat, battery overcharge and over discharge, output low voltage, fan fault alarm and RJ45 surge protection
Advanced Security:	Provides hardened security remote access via Ethernet Secure SNMPv3 protocol to monitor and manage the UPS, micro-USB for firmware upgrade and RS-485 for connecting environmental and security sensors. Built-in WiFi and Bluetooth hardware support with future optional firmware upgrade.
Advanced Management:	Support for technology allowing to easily, securely and quickly connect to DCIM with management, monitoring, control and alerting of Power Chain, Environmental, Cooling, Security, Asset and Connectivity Infrastructure Assets.
Advanced Remote Management:	Configure, monitor, and manage the UPS (includes graceful equipment shutdown) remotely via RS-232 or USB or Ethernet. Software is available for free download from www.panduit.com/ups
